SUMMARY

Full-stack developer who's launched projects from the ground-up, modernized legacy systems, and earned recognition for delivering impactful work. Experienced across e-commerce, civic technology, and nonprofit research. Collaborates well with teams and enjoys solving real-world problems with thoughtful solutions.

PROFESSIONAL EXPERIENCE

Software Engineer

RTI International – Durham, NC | 2026 - Present

- Develop new features and maintain existing functionality for scientific research initiative platforms and tools.
- Debug and optimize code to improve application performance and reliability.
- Helping manage database design, optimization, and code quality standards.

Web Developer

City of Pittsburgh – Pittsburgh, PA | 2023 – 2026

- Launched and maintained city government website and communication services from ground-up.
- Collaborated with stakeholders to align project goals with user needs.
- Managed databases and servers for platform stability and performance.

Web Developer

Online Stores – New Stanton, PA | 2021 – 2023

- Maintained and optimized multiple e-commerce sites; improved performance and site reliability as well as SEO.
- Brought several websites to ADA compliance under tight deadlines.
- Spearheaded testing and debugging to ensure seamless user experiences while adding business critical features.
